Maintenance. Made manageable.

Simple maintenance management for small and growing teams.

Keeping equipment running shouldn't require complicated software.

Micro CMMS brings your assets, maintenance schedules and work orders together in one practical, easy-to-use system.

Whether you're moving beyond spreadsheets or looking for a simpler way to manage maintenance, Micro CMMS helps your team stay organised and focused on the work that matters.

THE DASHBOARD · Open work by type and priority. Forecast workload and estimated spend.

Take control of your maintenance. Without the complexity.

Know your assets

Keep equipment information, locations and maintenance history organised.

Stay ahead of maintenance

Plan recurring preventive maintenance and see upcoming work before it's due.

Manage work efficiently

Create, assign, schedule and track maintenance work orders.

Empower technicians

Access assigned work, scan asset QR codes and complete maintenance tasks from a mobile device.

See the bigger picture

Use dashboards, forecasts and reliability measures to understand workload and recurring equipment problems.

Less administration. **More maintenance.**

Everything you need. Nothing you don't.

Practical tools to manage maintenance from planning through to completion.

Asset Management

Keep equipment, locations, meter readings and maintenance history together in one central register.

Work Order Management

Manage planned, corrective and breakdown work, with estimates, actual labour, completion notes and follow-up review.

Preventive Maintenance

Plan calendar- or meter-based maintenance, forecast upcoming work and automatically generate due work orders.

Visual Scheduling

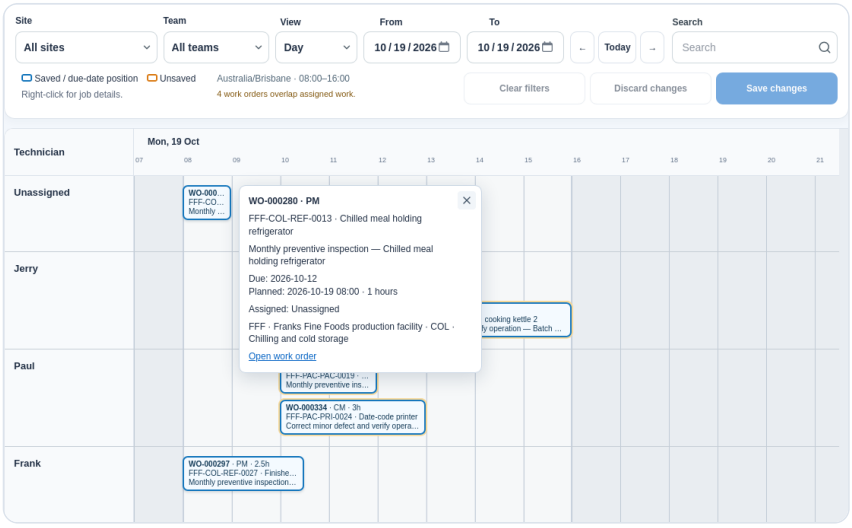

Drag jobs between technicians and times, with half-hour planning and filters for site and team.

Reliability & Reporting

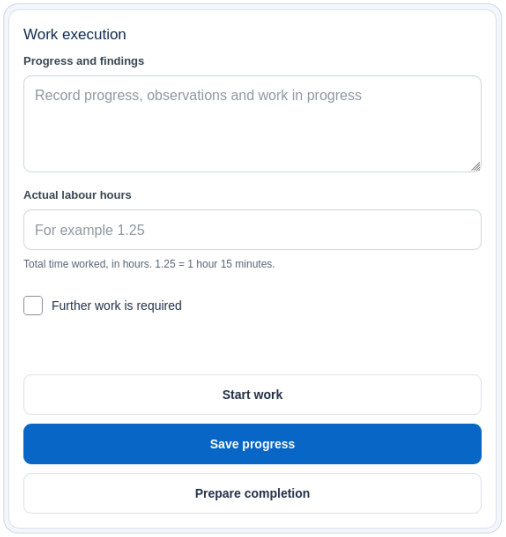

Review PM compliance, MTBF, MTTR and availability. Spot recurring problems and export lists to Excel.

Mobile Technician Workspace

Find and claim unassigned work, scan assets, record findings and labour, and complete assigned jobs.

DESKTOP · Site and team planning, with job details.

MOBILE WEB · Work execution.

Scan. Identify. Maintain.

Connect equipment to maintenance information using asset QR codes.

Print individual or bulk labels on A4 sheets or label rolls. Scan for open work and recent maintenance history. This promotional example opens microcmms.com.

Ready to make maintenance manageable?

Bring your equipment, maintenance plans and team together with Micro CMMS.
